Release date: 14.08.2023 Manufacturer: Russian Federation TY 20.30.22-002-69372620-2020

Primer EPPEX CROSS

CERTIFICATE

State Registration Certificate № RU.01.PA.02.008.E.000319.03.21 from 23.03.2021.

System including primer «Eppex» and enamel «Polytex» undergone accelerated environmental tests in «LKP-Khotkovo-Test», LLC NPO «LKP» to confirm projected lifetime of the coating – 20 years.

Declaration of Conformance POCC RU A-RU.PA01.B.66148/21.

DESCRIPTION

Two component epoxy primer for steel and concrete surfaces.

FIELDS OF APPLICATION

EPPEX Cross primer based on zinc phosphate pigments with high anticorrosive efficiency is used as a primer or interlaminar coating in wet-on-wet systems (rapid overlap) with mechanical and / or chemical exposure. It can be used as an independent coating indoors. It is suitable both for new metal structures anticorrosive treatment and repair work. Thick-layer application is possible in one pass. The material can also be used as a primer layer for concrete surfaces anticorrosive coatings.

Best decorative effect of the coating in wet-on-wet systems is achieved with application of a wet film thickness up to 175 microns at viscosity of 18-25 seconds. Overlap with finishing materials should be carried out within 25-60 minutes at a temperature of 23-25°C.

Information on the material resistance to various media is available on request.

Main fields of application: oil and gas industry, power engineering, mechanical engineering, transport construction.

TECHNICAL DATA

Colour Grey, reddish-brown, other colours - due to customer need

Gloss Matt

Mass fraction of dry residue component A 70±5%(depending on the colour)

Adhesion to metal (GOST 15140), no more 1 point

Density component A1,35±0,15 g/cm³Density components A+B1,30±0,15 g/cm³Max. one layer thickness, viscosity 25 s500 microns wet layer

Dry volume residue 52±3%

Dry film thickness and estimated consumption Dry film thickness, microns Estimated consumption, g/m²

 min

INSTRUCTION FOR USE

Metal surface should be abrasive blasted to grade 1 or 2 due to GOST 9.402 (Sa 2,5 or Sa 2 to ISO 8501-1:2007). Cleaned surface must be free of dust and grease.

If the quality of surface preparation decreases, the service life and its operating performance may change.

CONDITIONS

Two component epoxy primer EPPEX CROSS is applied on the surface at the air temperature from +5°C to +35°C and relative humidity no more 80%.

Surface temperature should be 30 higher than dew point.

APPLICATION

Blending The product is two component. Component A is a dispersion of pigments and

anticorrosion filler in epoxy resin. Component B is a hardener solution. Mix the contents of the containers in the supplied proportions. After mixing, use within the

specified pot life.

Mixing sequence:

The basis (component A) is mixed with a construction mixer. Then mixed hardener (component B) is added to the basis (component A) and thoroughly mixed with a

construction mixer.

Attention! Careless mixing or incorrect ratio can lead to uneven curing and painting

film properties weakening.

Proportions 100:10 by weight

7:1 by volume

Pot life at 20°C, no less 5

Air-free spraying Thinning:5-30%

Nozzle diameter: 0,011-0,017" Initial pressure: 120-180 atm

Air spraying Operation viscosity:18-60 s

Thinning: 10-35%

Nozzle diameter:1,4-2,5 mm Initial pressure: 3,0-4,0 atm

Brush, roller Can be recommended for small and hard-to-reach areas. Thin the primer depending on

the working conditions when using brush.

Thinner Formula thinner EPPEX

Cleaner Formula thinner EPPEX, thinners of type P4, P5.

Finishing Tubing, pistol and other spraying tools must be cleaned after using.

Cleaning Wash the tools after using immediately. The frequency of washing depends on the

amount of sprayed material, the temperature and the time since the shutdown,

including any time lag.

PACKAGE SIZE

Metal euro bucket 21 l: basis 21 kg Metal bottle 3 l: hardener 2.1 kg

STORAGE

Store in a tightly closed container in a closed dry room at a temperature from - $40 \,^{\circ}$ C to + $40 \,^{\circ}$ C, away from sources of ignition, protecting from mechanical damage, direct sunlight and moisture.

GUARANTED STORAGE LIFE

EPPEX primer (component A) guaranteed shelf life is 24 months from the date of manufacture, EPPEX CROSS hardener (component B) guaranteed shelf life is 12 months from the date of manufacture, subject to the consumer's compliance with the rules of transportation and storage. After expire date shouldn't be used without tests.

HEALTH AND SAFETY

When painting work, use personal protective equipment (respirators, gloves, glasses, etc.). Work inside the room should be carried out with artificial (local, general) or natural ventilation. Use the primer only in places without sources of open fire and ignition. Avoid contact with skin or eyes. In case of skin contact immediately wipe with a rag or cotton swab, rinse thoroughly with soapy water, do not use solvents. In case of eyes contact rinse with clean water for at least 10 minutes, consult a doctor. In case of ingestion, consult a doctor.
